

The CHECKLISTs

The 3 W's of Dressing you Kids for the Weather All Year Long

Warmth

Staying warm is all about insulating layers

Wind

Appropriate winter gear should provide some protection from the winter winds

Waterproof

Read the fine print, some boots are waterproof only to the seam where the upper meets the molded boot. Some mitts are water resistant but not water proof.

Don't forget that fit and function are important considerations.

Does the item fit your child?
Can they move and play?
Are they comfortable?
Can they grip and grab?
Are they protected from the elements?
